

WORLD HAPPENINGS  
BRIEFLY TOLD

Announcement is made by the minister of National Revenue, Hon. W. D. Euler, of the coming into effect of the trade treaty between Canada and the Baltic Republic of Latvia.

The British Government will establish agricultural schools to train idle coal miners to be farmers, preparatory to their migration to the Dominion to settle upon free land.

Lord Salsburgh, Lord Chancellor of Great Britain, heads the nineteen delegates from Westminster on the trans-Canada tour of the British Empire Parliamentary Association.

Plans under consideration of the New York Central Railroad call for the co-operation of the Canadian Pacific Railway in establishing air mail routes between Minneapolis, St. Paul and Winnipeg via Duluth.

Miss Amelia Earhart, the first woman to fly the Atlantic ocean, has sent a cheque for \$1,500 to Commander Richard E. Byrd as her contribution toward the Byrd Antarctic expedition.

Believing that Alfred Lowenstein might have been poisoned, the family of the dead man has requested permission to file suit charging an unnamed person with poisoning Lowenstein, in the event traces of poison are found in the body.

Sir Austen Chamberlain, foreign secretary, announced in the House of Commons that Great Britain had reached a compromise with France over the naval disarmament question which would be submitted to the other naval powers and eventually to a disarmament conference.

The cabinet council has confirmed the appointment of the commission to enquire into the return of the natural resources of Manitoba to the province. The personnel will be Mr. Justice Turgeon, supreme judge of the Saskatchewan court of appeal; Hon. T. A. Crerar, and C. M. Bowman of Waterloo, Ont.

Hal B. Donly, former editor and proprietor of The Simcoe Reformer and former president of the Canadian Weekly Newspaper Association, is dead. He had been in poor health for some time and retired from active newspaper work several years ago, after he had built up one of the best known weekly newspapers in the Dominion.

## Modernizing E.P. Ranch

## Electric Plants Furnish Light and Pump Water For Ranch Buildings

The ranch of H.R.H. the Prince of Wales, has been electrified. Two large individual electric plants, of the type used by thousands of Canadian farmers, were installed recently on the E.P. ranch, completely electrifying the many buildings which form a small city on the farmstead. Two electric residence water systems were also installed to supply drinking water, so that kerosene lamps and water from a pump are as rare at the ranch house as they are in the Prince's home in London.

## Stabilizing Easter

## Hoped That International Agreement Will Be Reached For Fixed Dates

The measure stabilizing Easter in Great Britain and Northern Ireland, given third reading in the House of Lords recently, will not be effective until an international agreement has been reached, it is stated.

The bill provides for observance of Easter on the Sunday after the second Saturday in April, instead of determining the date by the phases of the moon.

One of the world's first hospitals was founded by Princess Macha, in Ireland, about 300 B.C.

"What little children go to heaven?" "Dead ones!"—Sondagenisse-Strix, Stockholm.

W. N. U. 1745

## Farmers' Marketing Tour

Canadian National Railways' Tour To Great Britain and Denmark, 1928

(Continued.)

We bade London an early farewell, being on the way to Cambridge by 8.30 a.m., passing through Waltham Cross with its Abbey of the Holy Cross, re-founded by King Harold, in 1060, Chesham, which was invaded by the Danes in 893, and Epping Forest, the former royal game preserve, which is now the Londoner's favorite playground.

It would be impossible to describe the charm of the colleges of Cambridge University, its peaceful setting among the wonderful lawns through which runs the River Cam, or the beauty of the time-worn masonry. Nor could one hope to convey the sense of atmosphere that time has given to this ancient seat of learning, something of which we caught even in our hurried trip through the grounds. Fortunately, we had the opportunity of visiting King's College Chapel. The towering vaulted roof of this poem in stone, the softened light mellowing through the stained glass windows, the dim shadows, the beauty of the organ poised high in the centre of this noble building, spoke to heart and mind, and soul, of man's aspiration to Divine things. King's College Chapel is acoustically, as well as architecturally, marvellous; an anthem heard in it is unforgettable.

Proceeding to Caius College we had lunch in the dining hall, the Vice-Chancellor, Dr. Weeks, sitting at the head of the table. Again we felt the sense of privilege, of "atmosphere," for surrounding us were portraits of some of the famous men of Caius, dating from the Middle Ages, visible evidence of her continuity with an illustrious past.

A delightful luncheon was followed by an address of welcome from the Vice-Chancellor, and a short talk from Sir Ernest Rutherford, whom some of us remembered as a one-time professor at McGill University.

Repairing to one of the lecture halls of the Animal Nutrition Institute, we listened to Professor T.B. Wood, General Director and Director of the Chemical Section, who described the work of the Institute and some of the experiments which had been conducted with a view to finding standard maintenance rations for hogs, cattle, horses and poultry.

Professor Sir R. H. Biffen, Director of the Plant Breeding Institute, then discussed the experiments which had led to the production of Yeoman Wheat, a wheat of high yield and possessing some of the qualities of the harder wheats of Canada.

Visiting the Forestry Section, we saw specimens of our own Douglas Fir, Bird's-eye Maple, Canadian Poplar and one of the finest specimens of English oak panelling in the world. The calorimeter with a hog inside it, the chemistry room and the Low Temperature Station were examined. This last was full of interest to us. Here meat hanging experiments and tests for discovering the best methods of carrying apples and rabbits in low temperatures were being conducted. These and the work of the station were explained by Sir William Hardy at a meeting in the University Arms Hotel, after which undergraduates entertained us to a musical programme.

The itinerary for the following day provided for a visit to one of the most remarkable concerns in the world, Chivers & Sons, Ltd., of Histon, Fifty years ago Chivers were orchardists, selling fresh fruit on the London and Bradford markets, but a glut which forced them to sell to the jam manufacturers, changed their whole policy. They determined that they would themselves make jams. They enlarged their orchards. Insect pests led them to keep poultry. The failure of hens to keep down the orchard pests induced them to add ducks. Then they went on to cattle, pigs, sheep and bees. Today Chivers farm 6,000 acres of land and raise annually 12,000 chicks, 6,000 ducks, and 2,000 pigs. Histon cattle have won four championships, one reserve, seven firsts and four second prizes at the last Royal Show of England, and five championships were included among the awards won by Chivers at the 1925 and 1926 Royal Shows. They have been no less successful with their Yorkshire and Middle Whites in winning championship awards. They also keep Suffolk sheep and Percherons.

It was our pleasure to spend half a day inspecting as much of the farms and orchards as could be covered in that time. Among the animals we saw was Histon Wild Queen, champion of the Royal Show, whose average milk yield with her first five calves was 11,944 lbs. The Histon Dairy Short-horn herd is a genuinely dual purpose herd. Many of the cows exceed 1,000 gallons annually. There is also a Lincoln Red shorthorn herd of 150 females. Their Yorkshires and Middle Whites are the most outstanding to be found anywhere and it was an inspiration to see the remarkable size, smoothness and finish of these animals.

But famous as the concern is as a farming organization, it is the combination of farming, manufacturing and marketing which makes this firm unique. From Chivers factory a whole trainload of goods leaves every day. The factory is the last word in efficiency. The pans in which the fruit is boiled are lined with silver. Jam jars are filled by machines at the rate of 150 to 200 jars per machine per minute. Miniature trains carry the products from department to department. Everything is kept moving. Not a moment is lost, yet there is no hurry, while the workers were evidently contented and happy, thanks to the personal interest that is taken in their welfare and the institution of co-partnership and profit-sharing. What a contrast from the

## OUTSTANDING EMPIRE FIGURES

Outstanding empire figures who have achieved world-wide distinction are included in the list of British Parliamentary Association delegates who will begin a tour across Canada on August 24, from Quebec city. Among the party will be those pictured above: (1) being David Kirkwood, Glasgow Socialist, member of the House of Commons, whose fiery remarks once caused his suspension; (2) Sir Patrick McGrath, well-known journalist and president of the legislative council of Newfoundland; (3) Viscount Peel, former secretary of state for India and now commissioner of works, whose duties include supervision of the Tower of London and royal residences; (4) Lord Thomson, ex-secretary of state for air, who believes future travel will be by aeroplanes serving as imperial links; and (5) Thomas Shaw, who started work as a weaver when ten years old and who became minister of Labor in Ramsay MacDonald's cabinet in 1924.

little barn, still standing, in which the first boiling was made.

Before leaving we were entertained to tea in the company's dining hall, when Mr. J. R. Chivers and Mr. W. B. Chivers told us something of the history of their famous firm and presented every one of us with two tiny jars of jam, exactly like those which were specially made for the Queen's Doll's House, exhibited at the great Wembley Exhibition, in 1924. These little jars of jam are the smallest in the world.

No finer lesson in the marketing of farm products, and for that matter in the growing of them, could have been given to a party of farmers or more pleasure afforded us in the learning of it.

(To Be Continued.)

## Raise English Pheasants

Experiment Is Being Made To Introduce Game Bird In Saskatchewan

An attempt is being made in the Alsask and Lovern districts in Saskatchewan, to raise English pheasants of the ring-necked variety. It is not many years since Hungarian partridge was introduced into Western Canada. The experiment will take some years, it is said, and if successful will furnish an added attraction for bird hunters.

## Seeking Information

A witness was being examined, "My Lord," he said, "you can believe my statement, for what I have said is absolutely correct. I've been wedded to truth since my childhood." "Quite possible," replied the Judge, "but what the court wants to know is how long have you been a widower."

## DELEGATES FROM RUMANIA

Judging by the smiles of the two Roumanian delegates to the Baptist World Congress held in Toronto recently soup tastes the same in any language. The picture was taken in mid-Atlantic on the Canadian Pacific liner "Montroyal" which was chartered by delegates to the Congress from Europe. There were thirty-eight different nationalities in the party.

## A Cheerful Personality

People Who Are Pleasant and Sympathetic Have Many Friends

There are smiles and smiles, but the one from the heart is the one which is always remembered. Forced pleasantness is never convincing. The happy faculty of listening gracefully to another's woes and never talking of one's own troubles is the thing most difficult to remember and will do more toward lightening life's burdens for the sad ones than anything you may do. Everyone in trouble wants to talk of it. No one cares about your own distress. If you can listen gracefully when your own heart is heavy and smile like you meant it, your work for that day is well done.

Cultivate a cheerful personality if you would be popular. No one wants a grouchy in the party. Laugh and the world laughs with you; is as true to-day as of yore, and becoming more and more so as time goes by. Life is so short and there is so much to be lived, that sorrowful persons have no place in the scheme of existence.

## Increase In Immigration

Immigration to Canada for June amounted to 20,303, as compared with 18,052 for June a year ago, an increase of 12 per cent, according to a statement made public today by the department of immigration and colonization. For the three months April, May and June, immigration has amounted to 70,927. The principal sources have been British, 23,685, and United States, 9,343.

## Sees Good Market In Canada

Great Britain Waking Up To the Importance Of Canada As Trade Centre

"In the past two years the British manufacturer has been waking up to the importance of Canada as a trade centre, and for this reason the Overseas Trade Department is reorganizing and improving its system in this country in an effort to bring the necessary facts before the manufacturers of the Old Country," said W. J. Glenn, Inspector General for the organization in question, upon his arrival in Montreal. "We are not here to wave the flag, and ask Canadians to buy British goods merely because they are under the Union Jack, but we want to create an organization here that will enable the manufacturer in England to become acquainted with the problems and requirements of Canadian importers," he stated.

## Winnipeg Newspaper Union

## A Chic Frock For the Junior Miss

The little one-piece frock shown here is a smart and practical style for all daytime wear. The skirt has an inverted plait in the centre front, and the sleeves are long and gathered to narrow wrist-bands, or short and finished with shaped cuffs. A note of contrast may be introduced in the shaped collar and set-under vestee, and the belt fastens with a buckle in front. No. 1808 is in sizes 6, 8, 10, 12 and 14 years. Size 8 requires 2½ yards 32-inch, or 2¼ yards 38-inch material, and 1-3 yard 38-inch contrasting (cut crosswise). Price 25 cents the pattern.

## Should Make Interesting Book

Novel Centering Around Rebellion Of 1885, Will Likely Take Well

Announcement by Miss Carrie MacGillivray, of Toronto, that she purposes writing a novel centering around the Northwest Rebellion of 1885, is interesting. A good novel with the uprising of '85 as a background should take well. Those were colorful and romantic days in the West's history and they have not received adequate treatment in the printed page.

Miss MacGillivray appears well equipped to write such a novel. For a number of years she has been attached to the staff of the Dominion Archives, and she has already tried her pen at writing with considerable success. The thoroughness with which she intends going about this latest work also appears to portend success. She has already visited the scenes of the Duck Lake massacre and other places of interest and importance linked with the outbreak of '85 and purposes making further researches. She will be wished well in her enterprise and it is also to be hoped that her novel will contribute to a greater general interest in the colorful days with which it will have to do.

## Aid For Mrs. Capt. Hinchcliff

Gift Of \$50,000 Is Made By Lord Incheape

A gift of \$50,000 has been made by Lord Incheape to provide for others who might suffer from the disaster in which his daughter, the Hon. Elsie Mackay, perished with Captain Walter Hinchcliff. They were lost in an attempt to fly the Atlantic from east to west.

The money was put at the disposal of Winston Churchill, chancellor of the exchequer. He was given absolute discretion as to its use and he has handed it to the public trustee "for administration accordingly."

While Captain Hinchcliff's widow was not mentioned by name in the announcement, the sum is understood to have been given in response to her claims that there was a moral obligation on Lord Incheape to provide for her because the whole scheme of the flight came from Miss Mackay.

## Not Confined To Wales

Needless Night Noises Are Public Nuisances In Every Country

The British Medical Association, meeting at Cardiff, Wales, declared war on unnecessary street noises as a menace to the nation's health.

A resolution was adopted urging that needless night noises be called public nuisances and made punishable. Among them were mentioned the barking of dogs, clatter of milk cans early in the morning, cut-outs of motorcycles and noises of parties going home from dances.

Dr. John Stevens, of Edinburgh, estimated that such noises impaired the working efficiency of the country by \$5,000,000 a week. He explained that they affected the central nervous system through the disturbance of sleep, and also caused functional disturbances of the body.

## Wanted The Usual Bonus

"MacGregor," said the butcher to the thrifty one, who was planning to make an exit from the neighborhood, "I have every reason to believe that you will never pay me the amount due. It would be very foolish of me to sue you and you have nothing of value that I care to attach. I'll just give you a receipt and call it paid in full."

"That's awfully nice of you," said Mac.

A few moments later the merchant noticed that Mac was still resting his pedantic extremities in the store.

"Was there something you wished to speak to me about?" asked the merchant.

"Well, not exactly. But isn't it customary to give a fellow a cigar when his account's been settled?"

## Quite Possible

"The evening wore on," continued the man who was telling the story. "Excuse me," interrupted the would-be wit, "but can you tell me what the evening wore on that occasion?"

"I don't know that it is important," replied the story-teller, quite unperturbed. "If you must know, however, I believe it was the close of a spring day."

## Who Is "The Public?"

It is just as true of a nation as of an individual that whatever it sows it shall reap. All history shows the working out of this law. How is it, then, that we are all so ready to forget it and hold ourselves absolved from community guilt by laying the responsibility on that vague creature known as "the public?"

## Modern Aids To Navigation

Direction Finding Stations Prove To Be Highly Satisfactory

The Canadian Department of Marine is erecting on the Hudson Strait, instead of lighthouses, direction-finding stations. Work is being pushed forward on three stations this summer, one on the Baffin Island side of the strait, the others on the south side at convenient points. Wireles may thus be said to be displacing the lighthouse as an aid to navigation on Canada's experiment in maritime commerce over the Hudson Bay route.

Direction-finding stations are found to be highly satisfactory for shipping on other parts of the Canadian coast. Calls by radio are sent in from the ships at sea to the nearest direction-finding station on land, asking for bearings. The receiving instruments at the station are so designed that invariably the directional wireles operators are able to tell with accuracy the course of the ship from which the signals are received. The desired information is promptly sent from the station to the calling ship, which is enabled to proceed on its course with confidence even though it may be enveloped in fog.—Christian Science Monitor.

## Red River Voyageur Dead

One Of Last Survivors Of Courageous Northern Adventurers

One of the last of the Red River voyageurs, Eli Carriere, 89 years of age, died recently at Winnipeg, following a few weeks illness. Carriere was one of the band of intrepid and courageous men organized by the Hudson's Bay Company to direct the carrying of freight to Far Northern Canada and to return with the furs.

He assisted Colonel William Kennedy to organize the Red River Voyageurs, which went to Egypt in the eighties.

## A Royal Motor Mechanic

King Boris Of Bulgaria Fixed Engine For Professor

When two professors at the American College at Samokov, 30 miles from Sofia, Bulgaria, had engine trouble while returning from the earthquake zone by automobile, a stranger volunteered his assistance. Throwing aside his coat and hat and rolling up his sleeves, the friendly young chauffeur raised the hood, examined the carburetor, magnet and spark plugs and within 10 minutes had the engine going again. The Americans later learned it was King Boris, of Bulgaria.

## Indians Surrender Lands

12,000 Acre Blocks In Saskatchewan To Be Sold

W. M. Graham, Indian Commissioner for the Prairie Provinces, announces securing the surrender of 12,460 acres of land on the Little Black Bear Reserve in the Balcarres, Sask. district. It is all good farming land, but much too extensive for the 40 persons then in possession. The land will be sold at public auction and the proceeds applied to improve the living conditions of the Indians.

## Old Roman Village Found

Baron Beaverbrook's newspaper "The Daily Express" with the co-operation of the London Museum has discovered the remains of the first Roman British pile village to be found in England, at Brantford-on-Thames. The village is said to be 2,000 years old. It is believed, however, that the site was occupied in 500 B.C.

The island of Java belongs to the Netherlands.

## Town & District

The harvest boys are enjoying the side-door pulman ride these days.

Several local farmers state they intend to start cutting grain today.

Within a week, wheat cutting should be general throughout this district.

Miss Alice Brunton is down from Calgary visiting her sister, Mrs. H. Payne.

After the intense heat the cool weather Sunday was a grand relief for everyone.

The tea to be given by the Catholic Women's League next Saturday will be only \$50.

The street light at The Call office corner has not improved any during the night—those kissing parties are out of sight.

Ten thousand, green Englishmen are coming to Canada to help harvest the great wheat crop—they'll not be so green by the time it is harvested.

Mrs. G. Preston came down from Calgary and spent a few days last week visiting her parents, Mr. and Mrs. P. MacLean, and met a number of former Gleichen friends.

The Blackbirds had a great crowd at the Community Hall last Wednesday and if the boys are going to continue that head of "mud" they'll had better change to "Earlybirds."

Miss Angelina Blais, who for the past three years has been going to school at Morrisville, Alta, has gone to Three Rivers, Quebec, to continue her studies. All her young friends of this district wish her luck.

R. C. Clifford and two boys returned a week ago from spending a vacation of several weeks in the vicinity of Banff. They express great admiration of the Yoho Valley.

Again we advise readers to be careful to note the heading "Twenty Years Ago." Last week F. R. McKay was accused of building a new house—that was twenty years ago.

All will be pleased to learn that Edith Hutchison has been successful in passing her second year high school examinations and Elmer Bollinger the third year examinations.

Mr. John E. Wodell, wife and daughter, Anna, of Calgary, spent Saturday and Sunday visiting The Call family. Mr. Wodell is editor of the Alberta Farmer and on the editorial staff of the Calgary Herald.

The Catholic Women's League will hold a tea and sale of home cooking on Saturday next, August 18th, starting at 2 o'clock. The proceeds will go towards meeting the expenses incurred in improving the Catholic cemetery. It will be held in the butcher shop formerly occupied by Mr. Hansen.

Last Wednesday the Blackfoot agency staff paid out about \$3,000 treasury money, and the Indians had a gay time spending it in town and held their usual horse races. Three thousand is not much now to our wealthy red brothers since they became farmers, yet it was appreciated as it was the first pay since the Calgary Stampede.

Monday night six degrees of frost was reported from the C. P. R. headquarters north of town, and although no definite reports of damage to grain is reported it is believed some damage may have been done. In local tile gardens are reported injured particularly on the open prairie and low places.

Mayor Purcell informs The Call that the work of constructing the concrete sidewalk on the north side of Crowfoot Street from Fifth Avenue West past MacCallum & Smith's garage is to be proceeded with at once. This will add another good improvement to go along with the well-graded streets and no doubt Alderman F. W. Brown will see equally as good work is accomplished.

A newly married woman was shopping, and was determined that the grocer should not take advantage of her youth and inexperience.

"Don't you think those eggs are very small?"

"I do," answered Howard, "but that's the kind the farmers send in. They are fresh from the country this morning."

"Yes," said the shopper, "that's the trouble with these farmers. They're so anxious to get their eggs sold that they take them off the nest too soon!"
